SG1I SGFOIA3 SG1I Dear I am writing to request that you return to us the original tape casettes of the Price-crane experiment. In our original agreement with we were to archive all of the SG1I original data in our files so that it would continue to be available for further research, and we were to supply with duplicates. In the case of these Price tapes, however, we were in a time bind and therefore submitted our originals. If you need copies for your files, I am certainly willing to take responsibility to duplicate them for you. The reason I wish to get them back, beyond having complete data in our archives, is that we believe we have developed a set of linguistic indicators which permit us to begin to discriminate as to what is correct and what is incorrect in remote viewing transcripts. We are now in the process of checking our hypothesis by passing old transcripts through our discrimination sieve, and we are especially anxious to reexamine our best transcripts from the past. I believe there is nothing irregular in our request, as you can determine by talking with and we sorely need the data to help us SG1I evaluate our new discrimination procedures. With best regards, H. E. Puthoff, Ph.D. Senior Research Engineer Radio Physics Laboratory HEP:dlt SG1I
